

***Are you ready to Design & Test path breaking software products?***

*It's your chance to work with one of the best software solution companies in India - QA InfoTech, and be an integral part of teams that pride themselves on innovation. We are coming to your college to select the one who can think different, visualize beyond the horizon and has the spark to do something extraordinary. It's not just another job, it's a collaboration between emerging software design techniques and a brilliantly sharp mind.*

*We at QA InfoTech have cross functional agile development teams that work as startups (teams that develop ideas into functional products) and also provide development services in evolving technologies like Blockchain, Machine Learning along with standard technologies like Python Java, .Net etc. With us, you will get opportunity to contribute/learn in all aspects of development. For example:*

- Writing well designed, efficient and testable code along with highly skilled developers as your mentors*
- Working with experienced developers and devops team to analyse/debug/fix application performance issues.*
- Participating with team and product managers to ideate software solutions using microservices, serverless architecture.*
- Working with database team to tune database/SQL queries.*
- Working with security team to identify/fix application security vulnerabilities.*

*Some of the technologies that you will work on:*

- Blockchain*
- Machine Learning*
- Computer Vision*
- Java*
- Python*
- C#*
- NodeJs*
- PHP*
- Objective C*
- Android*
- AS400*
- AWS stack*
- NoSQL*
- ReactJS*
- Vue JS*
- Docker*
- Vagrant*

*Expectations*

- Excellent programming skills*
- Understanding of Object Oriented analysis and design*
- Understanding of common design patterns.*
- Good analytical and teamwork skills*
